Neak Loeung Bridge (Kingdom of Cambodia)

This project involved the construction of a bridge in Neak Loeung district, Cambodia, where two important economic routes in Southeast Asia, the Asian Highway (NH1) and the Southern Economic Corridor, cross the Mekong River. The aim of the project was to ensure safe and smooth transportation within the area.

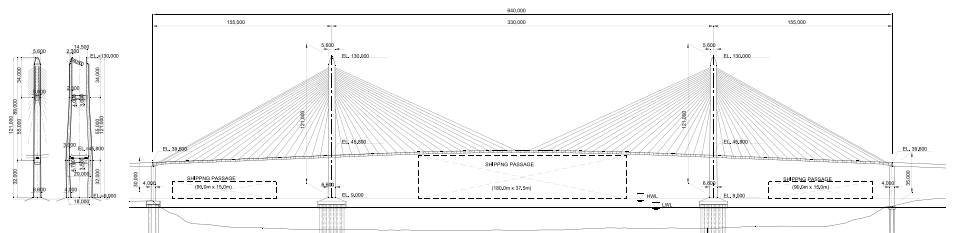

Bridge Type: Pre-stressed Concrete Cable-Stayed Bridge
 Length: 640m (Main Bridge)
 Main Span: 330m
 Pylon Height: 105m
 Deck Width: 13.5m

- Services provided by Chodai
- 1) Project discovery
